ACROSS

1. Waves from an earthquake are known as these.
2. In 1980, this Washington State mountain gave North America its largest volcanic eruption.
4. Molten rock that is found beneath the earth's surface.
7. Mountains formed from the build-up of volcanic lava often take this shape.
8. A volcano that has not erupted recently, but may do so in the future.
9. A volcano that will not erupt again.

DOWN

1. An instrument used to detect and record earthquakes.
2. A type of volcano with broad, gentle slopes and built by the eruption of fluid basalt lava.
3. Molten rock that erupts from volcanoes.
5. A volcano that is erupting or has erupted recently
6. A vent at the earth's surface through which magma and gases erupt.
